Nasdaq

Director Software Engineering

January 2023 - April 2024 (1 year 4 months)

Montreal, Quebec, Canada

Metrio - Sustainability Reporting Software

Lead SRE

November 2020 - February 2023 (2 years 4 months)

Montreal, Quebec, Canada

Created the Site Reliability team and broadcasted the new culture and vision for the future of our application's infrastructure, automation and deployment.

Created the infrastructure deployment tool for GCP. Architected the new Continuous Deployment and Continuous Delivery stack. Created the telemetry stack based on Open Telemetry and the GCP tools. Contributed to the elaboration of our new data driven products.

Element AI

AI Developer

January 2020 - November 2020 (11 months)

Montreal, Canada Area

Work on the internal Azure based deployment platform for our SaaS products. Worked with Python, Terraform and Helm to improve application packaging. Created the monitoring stack based on Prometheus.

Premiere Performance

PowerWatts coach

October 2016 - March 2020 (3 years 6 months)

Coach and motivate athletes to achieve their goals

CloudOps

Container Solution Specialist

August 2018 - January 2020 (1 year 6 months)

Consultancy role where I had the chance to experience different sphere of the cloud native sphere. Projects included:

- * Infrastructure as code with OpenShift and Ansible to create on premise Kubernetes clusters
- * On premise monitoring stack with long term storage for Kubernetes based on Prometheus
- * SQL cloud migration
- * Giving workshops on Kubernetes
- * Improving the workshops packaging and delivery via a Go Command Line Interface (CLI) tool
- * Infrastructure as code Go CLI to deploy Google Kubernetes Engine clusters on GCP
- * Integrate to the Helm package to deploy charts via a Go lang CLI
- * Monitoring stack for Azure Kubernetes Service based on Prometheus. It was integrated in the main Python/Terraform infrastructure as code tool
- * Architecting new Security Operation Center based on Kubernetes and Elastic

Desjardins

DevOps

November 2017 - July 2018 (9 months)

Part of the team who put in place the Data Analysis component of Desjardins Digital. Responsibility included setting up the Apache Kafka and Apache Spark clusters as well as packaging and deploying the applications on the clusters.

Desjardins

Intern

May 2016 - March 2017 (11 months)

Montreal, Quebec, Canada

Powerwatts West Island
